

The GreenGUARDens Project approaches completion!

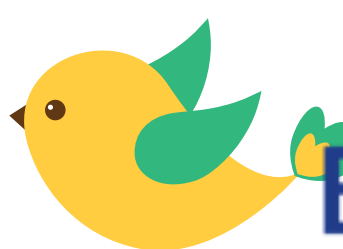

The Final Conference

The final conference of the project took place in Göttingen on 14th November. Kindergarten teachers, NGO staff and the project team mingled together in order to try and discover the best ways to support the development of the awareness of sustainability and green entrepreneurship in small children.

The Project Results

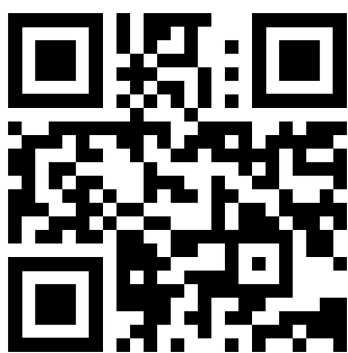

Teachers learned about all the materials created in the project:

- The VLL and Micro-challenges
- The Pedagogical Sequences
- The Audiovisual report

Erasmus+
Enriching lives, opening minds.

Check out the results:

Hands-on learning

Experts working with children enabled the participants to take part in practical activities - from a sensory warm-up to creating jewelry from different sorts of beans and turning a bunch of wheat into freshly-baked crackers. Teachers were able to experience first hand what makes these activities so appealing to children.

What does the future hold?

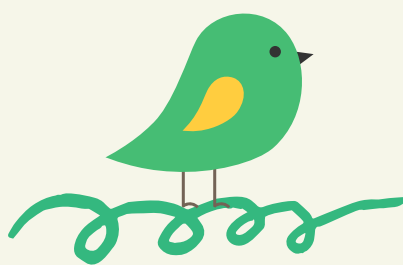

Soon, we will share some policy recommendations based on our conversations with local stakeholders. These will address both policymakers and kindergarten management.

Now that all results of the project are finalised, take another look at our experience in the 'GreenGUARDENS for the future' audiovisual report, and spread the word about the resources to anyone who might be interested in them!

Follow us for all the updates!
